A Textbook Of Occlusion

1. OCCLUSION. Occlusion may be defined as:" The contact of the opposing surfaces of teeth of the two jaws". T M J: The craniomandibular articulation (fig.1) and the capabilities of movements and limitations of the TMJ are very important to the dental profession, especially in the field of Prosthodontics. This is due to the fact that there is a relationship between the motion of the condyles and the positioning of artificial teeth and the allowable occlusal morphology of restored teeth.
