The Lockheed L-1011 TriStar, commonly referred to as the L-1011 (pronounced "L-ten-eleven") or TriStar, is a medium-to-long-range, wide-body trijet airliner by Lockheed Corporation.it was the third wide-body airliner to enter commercial operations, after the Boeing 747 and the McDonnell Douglas DC-10.The airliner has a seating capacity up to 400 passengers and a range over 4,000 nautical miles ...

Lockheed L-1011

Lockheed's legendary L-1011 TriStar first flew on 16 November 1970 and you'd be forgiven if you thought none were still flying today. In fact, there is just one, operated by Northrop Grumman, which is called Stargazer. This aircraft was originally delivered to Air Canada in 1974 and was modified in 1994 to launch Pegasus rockets for Orbital Sciences.

Did you know there is one Lockheed L-1011 still flying ...

Hijerome, most interesting post about the L-1011. I am a New Zealander too but live in the US and in the mid 1990s worked for Rich International Airways as a Flight Engineer on the L-1011. I'll have to check my log book to see if I did operate the flight engineer panel N309GB!
