When hockey star Linc Carpenter is banned from playing his beloved sport, he starts over slinging drinks in Tampa. He's inept as a bartender, so when the opportunity arises to train as a private investigator he takes it. He's not very good at that either, but he still manages to get hired to follow fashion mogul Quentin Faulkner.

You can have your very own personal bartender in your home, and also be the envy of your friends. We built a smart, Raspberry Pi powered bartender that can make drinks by mixing up to 6 ingredients together at the same time, so you can have anything from a rum and coke to a long island iced tea.

## **Smart Bartender - Hackster.io**

The automated bartender is not meant to replace human bartenders; rather, it is designed to enhance the mixology experience. We've built an Arduino + Raspberry Pi powered robotic bartender before, but it mixed drinks too slow to be practical. We want to build a new version which is faster, more accurate, and can mix more than one drink at a time.

## **Automated Bartender | Hackaday.io**

This bartender is built from a Raspberry Pi 3 and some common DIY electronics. Prerequisites for the Raspberry Pi Make sure you can connect a screen and keyboard to your Raspberry Pi. I like to use VNC to connect to the Pi.

The XML document is then sent to the BarTender Integration Platform (as a file to a Windows/SAP folder, as a data stream through a TCP/IP port, through an HTTP request, etc.) where it's transformed into BarTender XML (BTXML). The Integration Platform sends the BTXML directly to BarTender which processes the print request.

The recently re-branded Hacker Shack are back with a great new addition to their project line-up: a Pi-powered 'Smart Bartender' that dispenses liquid via six peristaltic pumps for precise mixology! The design can of course be modified (easily) for non-alcoholic drinks or even expanded upon for all types of mixing at the push of a button.
