Basics!of!Reverse!Osmosis - Puretec Industrial Water

Puretec designs and builds Reverse Osmosis systems ranging in size from 1 GPM (1440 GPD) to 500 GPM (720,000 GPD) that can remove up to 99.5% of dissolved salts and virtually all colloidal and suspended matter from the most challenging feed water including municipal, brackish, and sea water applications. Learn More RO System Maintenance

Puretec Industrial Water | Reverse Osmosis Systems

Reverse Osmosis works by using a high pressure pump to increase the pressure on the salt side of the RO and force the water across the semi-permeable RO membrane, leaving almost all (around 95% to 99%) of dissolved salts behind in the reject stream. The amount of pressure required depends on the salt concentration of the feed water.
