Sternberg's triarchic theory of intelligence is a fascinating theory that also makes a lot of sense. Its weakness, in my view, lies in its (excessive?) complexity. I feel that some of its concepts are not necessary and make it too cumbersome. This is a very interesting paper by Stenberg and one of his clearest (in my view).

Human Intelligence: Robert J. Sternberg

His triarchic theory of intelligence focuses on what he refers to as "successful intelligence" which is composed of three elements: analytical intelligence (or problem-solving abilities), creative intelligence (using prior knowledge and skills to deal with new situations), and practical intelligence (the ability to adapt to a changing world).

Psychologist Robert Sternberg and Triarchic Theory of ...

The Triarchic Theory of Intelligence or Three Forms of Intelligence was formulated by Robert Sternberg, a prominent figure in research of human intelligence. The theory by itself was among the first to go against the psychometric approach to intelligence and take a more cognitive approach. The three meta components are also called triarchic components. Sternberg's definition of human intelligence is " mental activity directed toward purposive adaptation to, selection and shaping of, real-world e
