Business Statistics-Practice Exam 1 - Practice Test 1 ...

Here, we will look at summary statistics, which give an overview of a data set, such as the average score on an exam. However, the average does not always tell the entire story; since half of the students could have gotten 100 on the exam, and the other half gotten 60. Using statistics, we can learn a lot more about how data is organized.

May 18, 1997: A few readers of this ibsd practice test bank have notified us that when they ask to look at a question's answer, they are returned instead to the chapter's contents. This problem seems to mostly be associated with people clicking on links before the entire long document is read.

Practice Questions for Business Statistics

$t = r n - 2 \quad 1 - r^2 = 0.33 \quad 30 - 2 \quad 1 - 0.33^2 = 1.85$ The critical value for $\alpha = 0.05$ for a two-tailed test using the t_{29} distribution is 2.045. Your value is less than this, so you fail to reject the null hypothesis and conclude that the study produced no evidence that the variables are significantly correlated.
