The abrupt impact and/or twisting of the neck that occurs in a millisecond during the trauma can cause the spine bones to crack or the ligaments to rupture, or both. The initial trauma or event may cause a cervical fracture and/or instability, which may also cause damage to the spinal cord and neurologic structures.

## **Neck Trauma - Society for Academic Emergency Medicine**

Cervical stenosis  
occurs when the spinal  
canal narrows and  
compresses the spinal  
cord and is most  
frequently caused by  
aging. The discs in the  
spine that separate
