The Cessna T303 Crusader was the last piston twin designed by Cessna and, in some ways, the most advanced. It was originally designed to compete as a low powered trainer but market economics changed in the late 70's, and it emerged as a cabin-class twin that would replace the 310 and compete with Navajos, Senecas and Barons.

The Cessna 337 Skymaster, arguably the most commercially successful push-pull attempt, at least in terms of numbers built. And although the 337 Skymaster isn't the most popular twin ever marketed, it's done all right for itself and has achieved its primary goal: eliminating asymmetric thrust and simplifying the pilot's workload in the event of an engine out.ü
