7.2 AN IDEALIZED MIXING PROCESS The reversible mixing of two gases, A and B, can be visualized with the aid of Fig. 7-1. The device is a cylinder fitted with two pistons: piston 1 is permeable only to gas A and piston 2 is permeable only to gas B. Figure 7-1a shows the original unmixed state, Fig. 7-1b an intermediate state, and Fig. 7-1c the final
