Clinker Ply. CONSTRUCTING A CLINKER PLY (LAPSTRAKE) BOAT. Back to Boat Building Methods Main Page. INTRODUCTION. Clinker (or lapstrake) construction involves the planking of the hull with adjacent planks slightly overlapping one another (in a stepped fashion). It is a method used in Northern European countries for centuries and produces a hull with graceful, tapering curves to the planking which stand out to emphasize the shape of the boat.

Clinker Ply - Selway Fisher

Clinker or Lapstrake is a method of attaching planks to a boat where the plank edges overlap each other. Overlapping planks are then fastened to each other and then to the frames. This age old method of planking, sometimes referred to as clinker planking, has been in use for hundreds of years. Much of the longitudinal strength of the hull is provided by the double thickness of the planking where it overlaps.
