A score of 1 is given when there is no information on that item or if it is poorly reported. A score of 7 is given if the quality of reporting is excellent and when full criteria have been met (in the User's Manual). A quality score is calculated for each of the six domains, which are independently scored.

Medical Application Critical Appraisal Guidelines ...

Critical appraisal checklists. There are numerous checklists available to act as aide memoires for evaluating studies and they can be very useful. However, a key issue in critically appraising studies is that, while it can be thought of in terms of being an academic exercise of 'ticking the boxes', the reason why we are doing it is to evaluate what weight we can put on the findings, and to evaluate how far we can generalise the results from trials into routine practice to inform clinical ...
