Having a strong set of overall laboratory safety rules is essential to avoiding disasters in the lab. Lab Manager recently scoured the safety policies of several laboratories to determine some of the most common lab safety rules out there, to help you whether you're developing or updating a set of policies for your own lab. Of course, safety rules are only effective when they are enforced ...

Your first microbiology field trip is to a large university hospital lab. Urinary tract infections are quite common, so it is not surprising that urine specimens make up a large proportion of the samples submitted for routine laboratory diagnosis. Nevertheless, you are surprised to learn that the lab technicians may examine 200 microscope slides of urine every day.
