However as DVB-T has now been in use for ten years a new standard, which is a development of the original DVB-T standard known as DVB-T2 is being developed. This would have backwards compatibility, but allow additional services and flexibility as well as a number of features to future-proof it. Previous page Next page More Audio Video Topics:

**What is DVB-T, Digital Video Broadcast - Terrestrial ...**  
The main differences between a DVB-T and DVB T2 system is that the multiplexer shall be connected to a T2 gateway. This T2 gateway receives one or several multiplex e.g one per PLP from the multiplexer and encapsulates these datas into BaseBand Frames. The T2 gateway send the content to DVB T2 modulators via the T2 Modulator Interface protocol.
