IDE Overview Eclipse IDE window consists of different views. Every view has its own tab. By default, Rell IDE has following views: Project Explorer - shows projects and their directory trees. Problems - shows compilation warnings and errors. Console - console output (when running programs). Outline - shows the structure of a selected Rell file.

Eclipse IDE — Rell v0.10.1 documentation

The Eclipse IDE is famous for our java Integrated Development Environment (IDE), but we have a number of pretty cool IDEs, including our C/C++ IDE, JavaScript/TypeScript IDE, PHP IDE, and more. You can easily combine multiple languages support and other features into any of our default packages, and the Eclipse Marketplace allows for virtually unlimited customization and extension.

What Eclipse versions are supported? Can I install more than one Scala IDE plugin for different versions of Scala? How can I increase the stack size? Find the answers to all of these and more, in our FAQ section. Go there.

Documentation - Scala IDE for Eclipse

When you download Eclipse code, documentation is provided in the form of HTML files, made accessible through a table of contents contained in a file called toc.xml. The contents of the HTML files can be browsed and searched easily with the Eclipse help system (see Help > Help Contents). The same information can be found online at the Eclipse documentation Web site.

Eclipse parses this output to find header directories, but it can't resolve include directories of the form *J/blah* without using *cygpath*. There is a heuristic that Eclipse Build Output Parser uses to determine whether it should call *cygpath*, but for currently unknown reasons the `ESP8266_RTOS_SDK` configuration doesn't trigger it.
