The Models 35/36 were developments of the Model 24, the first Learjet certificated in the Transport Category. They incorporate the 30-series wing, which has a 24-inch extension outboard of WS 181, drooped leading edge and vortex generators. There was also a 13-inch fuselage stretch and higher MAUW, but the major change was the addition of turbofan

LEARJET 20/30/50/60 Series - aviation.govt.nz

The Lear 35 / 36 is pressurized, like most airplanes, by engine bleed air. This air comes from the HP and LP bleed sources on the engine through a "BSV" (bleed switching valve) that regulates the bleed air pressure by controlling the mix of LP and HP air.
