Life in the Universe Exam 3 Flashcards | Quizlet

Extraterrestrial life is hypothetical life which may occur outside of Earth and which did not originate on Earth. Such life might range from simple prokaryotes (or comparable life forms) to beings with civilizations far more advanced than humanity. The Drake equation speculates about the existence of intelligent life elsewhere in the universe. The science of extraterrestrial life in all its ...

Extraterrestrial life - Wikipedia

Astronomy, Mythology, images, video, interactives, teacher resources, and classroom activities. Spanish and English, differentiated learning.

Classroom Activities and Demonstrations

The Drake equation is a probabilistic argument used to estimate the number of active, communicative extraterrestrial civilizations in the Milky Way galaxy.. The equation was written in 1961 by Frank Drake, not for purposes of quantifying the number of civilizations, but as a way to stimulate scientific dialogue at the first scientific meeting on the search for extraterrestrial

intelligence (SETI).

Drake equation - Wikipedia

Our universe is filled with spiral designs. Spirals can be found in the shape of DNA double helix, flowers, elephant tusks, sunflowers, hurricanes, draining water, horns of animals, a nautilus ...

Everything in our life has only mathematical patterns ...
