Preparations to conduct National Micronutrients Survey ...

The National Micronutrient Survey, however, showed a more detailed picture of the vitamin A deficiency prevalence in Zimbabwe [15]. The survey showed that 35.8% (n=346) of children 12-71 months had vitamin A deficiency, with serum retinol levels below 0.70[micro]mol/L. Among schoolchildren of 6-14 years age group VAD prevalence was 18% (n=657).
