## **Manual Method - YD25**

This page explains the methods used to diagnose a timing chain fault in the Nissan Navara D40, D22 & Pathfinder R51 YD25 engine. All common rail YD25 engines from 2005 have duplex (double row) camshaft timing chains. The duplex camshaft timing chain is built for a 300,000 km service life.

## **Diagnose Timing Chain Fault - YD25**

Sadly, the timing chains fitted to the Nissan Navara and pathfinder (with a 2.5L turbo diesel YD25 engine) have a weak timing chain that wears excessively in everyday use. You will usually hear a rattle, scraping, clicking or a grinding noise.

Nissan has failed to do a recall nor upgrade their weak lower timing chain and newer Euro 5 models suffer from the same problem. I found a topic where the timing chain snapped in a Navara produced in 2013. Just after 40K miles. So I don't think the statement is true that the timing chain should last the life of the motor.

### **Navara D40 timing chain issues | Nissan Frontier Forum**

We recommend that the timing chains in the YD25 engine be inspected for wear when the engines have travelled 100,000 kilometres and every 40,000 km thereafter. These engines can have a worn chain but present no abnormal engine noises and for this reason regular chain inspection is vital.
