### Rainbow Fish Resources and Activities | Teaching Resources

I used The Rainbow Fish resources from Twinkl to save me drawing the fish, then cut out scales of different colours sticking them on the fish with blu tack. First we counted how many shiny scales our Rainbow fish had and then worked out how many we could give to each of the other fish, still leaving the Rainbow fish with at least one.

KidZone Science Catch A Rainbow © Contributed by Leanne Guenther. Red, blue and yellow are called the primary colors. Just by mixing these colors, you can get all the colors of the rainbow: RED + YELLOW = ORANGE. RED + BLUE = PURPLE. BLUE + YELLOW = GREEN. What you need: red, blue and yellow food color; 1 cup milk; dish soap; shallow bowl

### Catch a Rainbow Science Experiment - Kidzone

Red, orange, yellow, green, blue, indigo and violet. Rainbows are seen in the sky opposite the sun and are caused by the refraction ( bending of light ) and dispersion ( splitting up ) of sunlight in drops of rain or mist. Sunlight hitting the rain or mist is dispersed into its constituent colours this is because the light is reflected at varying angles, creating a rainbow because the different colours refract and bend by different amounts.
