Do-It-Yourself | Kids - NASA Solar System Exploration
The solar system consists of the sun and everything that orbits, or travels around, the sun. This includes the eight planets and their moons, dwarf planets, and countless asteroids, comets, and other small, icy objects. However, even with all these things, most of the solar system is empty space. The solar system itself is only a small part of a huge system of stars and other objects called the Milky Way galaxy.
