Some people wonder if I am the same N. David Mermin as the coauthor, with Neil Ashcroft, of Solid State Physics. I am. I am. Although the book is still in its 1976 first edition, two thirds of it consists of eternal verities, and there is no time, even in a full-year course, to get to the remaining third.

(a) To calculate the probability, first divide the time into intervals such that $\Delta t \ll \tau$. Also, when $\Delta t \rightarrow 0$, the term Δt^2 , and the value of Δt approaches zero. The probability that no collision occurs in time interval Δt is given by the Drude model to be $e^{-\Delta t/\tau}$. It is important to note that the probability for no collision in interval Δt must hold for each time interval making up time t ; therefore the probability $P(t)$ for no ...
