### Turtleboy - Join the Revolution

Turtle is a ROS standard platform robot. Turtle is derived from the Turtle robot, which was driven by the educational computer programming language Logo in 1967. In addition, the turtlesim node, which first appears in the basic tutorial of ROS, is a program that mimics the command system of the Logo turtle program.

### TurtleBot3 - ROBOTIS e-Manual

Turtlebot was built for the cost-conscious needs of education and early-stage development. It uses off-the-shelf consumer electronics like the Orbbec Astra Pro sensor, a standard netbook and a robot base built from a repurposed robot vacuum cleaner to keep costs low. Turtlebot is the most affordable advanced ROS robot on the market.

### TurtleBot 2 - Open source personal research robot

Turtlebot is a robot turtle created by Baxter Stockman, appearing in the 2003 TV series episode What a Croc. Stockman, whose disembodied head now occupied an Utrom Exoskeleton, had tricked the mutant crocodile Leatherhead into thinking that he was a friend of the latter's Utrom family, and that the Ninja Turtles are their enemy.

### Turtlebot (2003 TV series) | TMNTPedia | Fandom

TurtleBot is a low-cost personal robot designed for hobbyists and researchers. It's open source, runs the ROS operating system, and combines a netbook with a Kinect 3D sensor and a mobile base.

### TurtleBot - ROBOTIS: Your Guide to the World of Robotics

The mobile platform Kobuki Turtlebot II is a low-cost mobile robot for education and research. Despite the price, this product offers a high performance and is able to carry out most of advanced robotic tasks like mapping, localization, etc.
