wood technology and processes answers - mikel901eg

The romanticized view of technology is that its mere presence in schools will enhance student learning and achievement. In contrast is the view that money spent on technology, and time spent by students using technology, are money and time wasted (see Education Policy Network, 1997).

9 Technology to Support Learning | How People Learn: Brain ...

In Design and Technology students are challenged to research, design and develop innovative and creative solutions. They apply skills of management in planning and implementing a process, at the same time as they manipulate tools and machines to produce high-quality products. This is a practical course where students can choose to work in the areas of wood, metal, automotive and photography.
