Weapons and Tactics - World War II

The Japanese program to develop nuclear weapons was conducted during World War II. Like the German nuclear weapons program, it suffered from an array of problems, and was ultimately unable to progress beyond the laboratory stage before the atomic bombings of Hiroshima and Nagasaki and the Japanese surrender in August 1945. Today, Japan's nuclear energy infrastructure makes it capable of constructing nuclear weapons at will. The de-militarization of Japan and the protection of the United States'

Japanese nuclear weapon program - Wikipedia

Bombers were the ultimate long range heavy weapons of World War II, a role they still have. They can deliver massive firepower directly to enemy's heart and destroy its vital resources, military targets, industry, eroding its strength in battle fields.
